

## Antenna outdoor dual 2.4/5GHz 11 dBi 65°H 16°V 4xN Female

1, High gain and directional, can be used for internet and WIFI signal coverage;

2, The latest MIMO technology and transport the signal faster and stable;

3, Dual frequency 2400-2500/5150-5850MHz can help the subscriber connect two different WIFI equipment at the same time;

4, Good directional WIFI coverage effect and can switch easily in different systems;

5, Low VSWR can increase the signal transport efficiency, small and simple installation way easy to install.

Product Name	2.4/5.8Ghz Panel Antenna
<b>Electric Specification</b>	
Frequency Range-MHz	2400-2500/5150-5850
Bandwidth-MHz	100/700
Gain-dBi	11/14
Horizontal beam width-°	65
Vertical beam width -°	16
F/B - dB	≥20
VSWR	≤2.5
Input Impedance -Ω	50
Polarization	Vertical / Horizontal
Maximum Power -W	20
Connector	2*N
<b>Mechanical Specification</b>	
Dimension-mm	237*229*50
Weigh-kg	0.66

## Installation
